

# Traveling on the Park Road with a Tek Pass

## Do You Have Your Ticket?

Remember to keep your ticket with you. You will need to show your ticket each time you board a bus.

## Plan Ahead

Use the guidance on this map to help you plan, especially if you are traveling east along the park road.

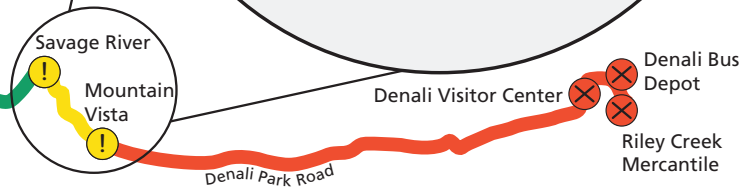

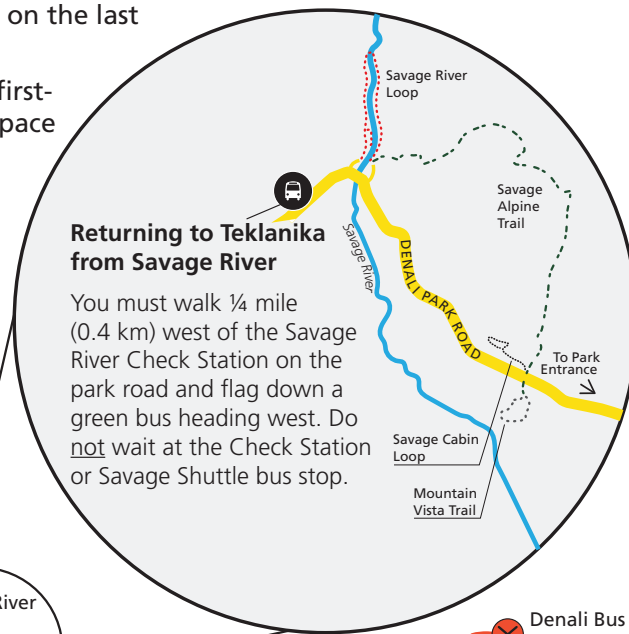

Have a plan to return to the campground before boarding the transit system. Check the transit bus schedules ahead of time and do not rely on the last bus of the day.

Each bus has space for two bicycles available on a first-come, first-served basis. Plan for the possibility that a bus may not have space for your bicycle.

## Interested in going on a hike?

On your first bus trip into the park, consider riding the bus west to the end of the road so you can look for areas to hike. Then, on the return trip or future trips into the park, you can plan to get off at those areas to hike. Help protect resources by paying attention to area closure signs and avoiding walking on social trails.

If you prefer to hike on a maintained trail, some are available in the Savage River area. However, returning to the campground from the Savage River area will require extra planning; make sure you know how to get back.

The Park Road west of the East Fork bridge is currently closed to all traffic including bicyclists and pedestrians due to construction work on the Park Road at the Pretty Rocks landslide.

**Not Recommended — Mountain Vista to Park Entrance**  
Traveling to these areas will require purchasing a new bus ticket at the Denali Bus Depot. If no tickets are available, you may be unable to return to your campground until the following day.

**Proceed with Caution — Savage River to Mountain Vista**  
Returning to Teklanika Campground will require flagging down a green Transit bus from a specific location: ¼ mile (0.4 km) west of the Savage Check Station. If you are traveling further east, please use the free Savage Shuttle and plan your return.

**Recommended — East Fork to Savage River**  
Flag down any green Transit bus to be picked up on a space-available basis.
